Professional Summary:

Currently working as a Software Engineer at Capgemini. I am a Computer Science student with solid previous experience in the administrative field and a great passion for technology. I intend to pursue a master's degree in the field as soon as I complete my bachelor's degree. My focus is on continuous evolution and learning, always seeking to contribute to the company's growth and results. I have skills in languages such as Java and PHP (Back-end), Angular (which I am currently using the most in Front-end), and knowledge in other technologies and languages such as C++, JavaScript, C, and Python. Experience in personal projects and freelance work has provided me with a solid foundation in these areas, and I am always willing to delve into any specific language to ensure work efficiency. I am proactive, organized, and determined to contribute to successful teams, constantly studying and improving my skills.

Qualifications and Qualities:

- Excellent learning ability and adaptation to new technologies and functions.
- Strong problem-solving and logical reasoning skills.
- Excellent communication and interpersonal relationship skills.
- Highly organized and detail-oriented.
- Determination, will, and drive to achieve established goals.
- Teamwork spirit and willingness to contribute to collective success.
- Solid experience in the administrative field, including budget management, high-responsibility financial dealings, and issuance of invoices and technical support.

- Portfolio of projects and personal knowledge in development available on GitHub: [My GitHub](#)
 - Here is the link to all the courses I have completed: Certificates (I am constantly studying on my own, improving in the field, so this list may always increase).
 - You can access my portfolio website here: [My Website](#)
-

Academic Background / Specializations and Courses:

- Bachelor's Degree: Computer Science - Universidade Nove de Julho (2022 - 2026)

In addition to the Bachelor's degree, I have completed over 45 courses in Development with programming languages such as Java, Python, C, C++, JavaScript, and markup and styling languages HTML and CSS. There are also courses related to frameworks such as Bootstrap, Spring Boot, and in-depth studies on object-oriented programming, as well as courses in Data Science and Design.
